Education on Customs Issues is Essential!

Joining us for a seminar at this time is a very good idea. Education is an essential element of proving to Customs that you are taking reasonable care in the management of your duty drawback program.

If you are new to duty drawback, this seminar is essential. You will have the opportunity to learn both from us and from the other companies represented in the class.

Or, if it has been a while, join us for a review of the basics, an update on Customs auditing procedures and helpful tips on preparing for a possible audit. And as always, we will provide an update on what's new at the Bureau of Customs & Border Protection.
